

Commitment to Safety and Success

Isolation vs Quarantine

Isolation:

- Separates people infected with diseases like COVID-19 (coronavirus) from those who are not.
- Restricts movement of sick people to avoid spread of the illness.
- Keeps people out of the public until the risk of transmission to others is low.

Quarantine:

- Restricts movement of people to monitor symptoms for early detection.
- Prevents the spread of infection or contamination.
- Should be communicated with clear guidelines from the authorities.
